**WELCOME APARTMENT MANAGERS AND OWNERS!**

Welcome Apartment Managers and Owners!

ForRent.com is designed to meet the needs of both online apartment shoppers and apartment community managers/owners. We recognize that the apartment communities and the apartment shoppers have a common goal, and ultimately that goal is to fill a vacancy.

For the apartment community owner, we offer a wide range of advertising products designed to maximize your exposure and get more leads.

For the apartment shopper, we offer a feature-rich website with useful, practical search methods and multiple ways for users to reach you.

**ForRent.com Management Console**

Managers can easily add, update or edit your properties in real-time through our online Management Console. You'll have 24-hour access to your listings, and the ability to upload your own photos, maps and floorplans, order virtual tours and talking ads, or change your profile information.

The ForRent.com Management Console not only makes managing your property listings easy-you also get comprehensive traffic reports that keep you informed of the effectiveness of your listings.

## HIGHLIGHTS

- The Management Console allows continual changes and updates to be made to your listings. It also lets you view the traffic and LEADS™ your property is receiving. Click on "Log In" under "Managers and Owners" on the ForRent.com homepage.
- Each listing receives a Username and Password, which provides access to the Management Console.
- For multiple listings within one company, a Group Username and Password is established. This enables all the properties to be viewed at one time and have access to a custom report.
- Once you sign onto the Management Console, your property listing will appear. Each tab takes you to a different section of your listing, allowing you to view and make changes as you wish. View your changes by clicking the "Preview Changes" tab.
- The Management Console provides reports that include information on LEADS and traffic and allow you to measure ad effectiveness.
